Board and Batten Metal Siding Panels

Board and batten metal siding panels have the look of wood board and batten, but without the maintenance. No more re-painting your wood every few years. Resistant to termites and fire.

WOOD FRAME WALL

BioLime is a light-density, three layered lime plaster / stucco coating system that does not crack and permeates heat and moisture from frame wall systems to ensure long-term, sustainable objectives.

System Calculator displays results as a 3/4" overall finish:

Bond XTRF: 1/4" applied

Base: 3/8" applied

Finish XTR: 1/8" applied

EVERLASTING, NATURAL COLOR PIGMENTS

BIOLIME PIGMENTS

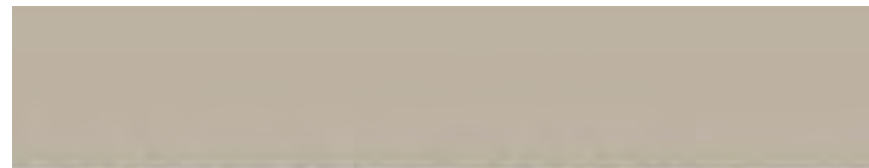

Earth pigments are naturally occurring minerals containing natural iron oxides and manganese oxides that have been used since prehistoric times.

Cave paintings dating back as far as 30,000 years are evidence of some of the first uses of earth pigments as an art form. The pigment was applied by hand or even blown through a hollow reed in a primitive airbrush type of technique on moistened limestone cave walls that bled the limestone during the process. This natural chemical reaction created the later Roman technique known as “fresco”. This ancient art form created durable, weather proof artworks that are forever dated in history.

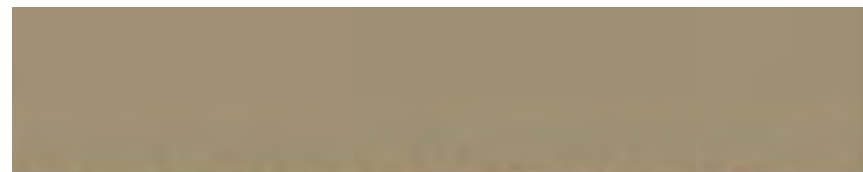

We use the exact chemistry to create the colors of all of our finishing products.

In similar fashion to ancient cave paintings artworks, BioLime colorants are unaffected by UV light and will not chip, peel or crack.

Achieve Everlasting, Natural Beauty with BioLime.

FAQS

SUPER DURABLE

Made of high-performance and recycled polymers (and absolutely no wood fibers), TimberTech Advanced PVC decking is highly resistant to moisture damage like mold and mildew, and it won't splinter, crack, cup, peel, or rot.

FADE & STAIN RESISTANT

Enjoy a richly hued deck for decades with protective capping that resists UV rays and staining.

SPLINTER FREE & BAREFOOT FRIENDLY

Better for bare feet and paws, TimberTech Advanced PVC decking won't splinter, and stays up to 30° cooler to the touch with 40% better traction, wet or dry, than competitive products.

SUSTAINABLE

Made in the USA from approximately 60% recycled material, including post-construction scrap like vinyl siding and trim, TimberTech Advanced PVC decking is a sustainable option. Plus, it's fully recyclable at the end of its useful life.

**Although TimberTech Advanced PVC decking is cooler to the touch than many other deck board products, all decking products will get hot in the sun. Additionally, the darker the decking color, the hotter it will feel. For hotter climates, consider choosing a lighter color.*

LOW MAINTENANCE

Never sand, stain, or seal your deck ever again. An occasional scrub and rinse are all that's needed.

BETTER CHOICE FOR FIRE ZONES

Passes tests for slowing flame spread: Class A Flame Spread Rating & WUI (Wildland Urban Interface) compliant.

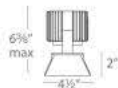

INDUSTRY-LEADING WARRANTIES

Rest easy knowing your investment is protected with a 50-Year Fade & Stain Limited Warranty and Limited Lifetime Product Warranty.

DESIGN VERSATILITY

With multiwidth decking and heat-bending capabilities, TimberTech Advanced PVC Decking allows you to create a truly unique design that shows off your sense of style.
